PROFESSIONAL SUMMARY

Full Stack React and Django Developer with experience building scalable frontend and backend applications using React.js, TypeScript, Django, and REST APIs. Skilled in responsive UI development, API integration, authentication systems, and full-stack application architecture.

EDUCATION

Government College University Lahore

Bachelor of Science in Computer Science (BSCS)

2021 – 2025 — CGPA: 3.3

Punjab College

Intermediate

2018 – 2020

Pioneer Public School

Matriculation

2016 – 2018

EXPERIENCE

Frontend Developer Intern

Call It Studio

Nov 2024 – Jan 2025

Lahore, Pakistan

- Developed and maintained 10+ responsive frontend pages using React.js, JavaScript, and Bootstrap
- Integrated REST APIs and improved application responsiveness through optimized component rendering
- Built reusable frontend components to improve development efficiency and reduce repeated code implementation

React.js & Django Developer

Code Xenix

Jul 2025 – Present

Lahore, Pakistan

- Built scalable frontend applications using React.js, TypeScript, and Tailwind CSS
- Developed backend APIs and business logic using Django and Django REST Framework
- Implemented authentication systems, API integrations, and reusable full-stack modules

PROJECTS

OGC Laboratory Management System | *React.js, REST APIs, Tailwind CSS*

- Developed frontend interfaces for a laboratory and inventory management system related to crude oil, soil, and material testing workflows
- Built responsive reusable UI components and integrated REST APIs for real-time operations
- Collaborated on operational modules for inventory, laboratory workflows, and process management systems

Melo - Task Management Software | *React.js, TypeScript, Django* | melo.codexenix.com

- Developed the complete frontend and backend architecture independently using React.js, TypeScript, and Django
- Built task management workflows including boards, tasks, workspaces, authentication systems, and API integrations

NovaHealth | *React.js, Django, REST APIs* | novahealth.pk

- Worked on both frontend and backend development for a healthcare platform using React.js and Django
- Built responsive interfaces, integrated APIs, and implemented backend functionality

AI-Based Lung Disease Detection System | *Python, AI, Deep Learning*

- Developed a final year project for classification of segmented lung regions in chest X-rays
- Worked on tuberculosis and pneumonia detection with severity analysis using AI-based techniques
- Implemented image processing and machine learning workflows for medical image analysis

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Bootstrap

Backend: Django, Django REST Framework, Jinja2

Database & APIs: PostgreSQL, SQL, Firebase, REST APIs

Developer Tools: Git, GitHub, VS Code, Chrome DevTools

Core Concepts: Responsive Design, API Integration, Component-Based Architecture, State Management
